Question	Answer
I can't find the formula I want on the drop down list on the Check Pickup window. Where is it? I was completing a Special Formula Authorization and assigned the special formula and now the formula does not appear in the food package drop down list on the Check Pickup window.	When using drop down lists, it is important to remember the mantra "scroll up." Often the drop down lists do not open to the first item on the list so it is important to scroll up and down when searching. In this specific case the formula assigned using Special Formula Authorization is the first item in the drop down list. Remember grasshopper, "scroll up."
I'm not sure how to ask about TV/video viewing on the Child Custom tab. Moms often say something like, "Oh, the TV is on all day, even when nobody's watching it."	<p>The Centers for Disease Control means for this question to be time actually sitting in front of the screen. CDC suggests this wording, "About how many hours did your child sit and watch TV, videos, or DVDs yesterday?" or you can ask about average hours.</p> <p>And remember – this question is just for children ≥ 2 years old.</p>
